

ANALISI DATI IDROLOGICI

*Osservatorio Permanente sugli
Utilizzi delle Risorse Idriche*

Autorità di Bacino Distrettuale Appennino Centrale

24 Giugno 2024

*Precipitazione media
porzione toscana ADAC
MAGGIO 2024
85 mm*

Bacino	Precipitazione media (mm)
FIORA	79
TEVERE	89

**Confronto % precipitazioni
MAGGIO 2024 vs medie
storiche ultimo trentennio**

Surplus +20%
Porzione regionale ADAC

*(corrispondente a circa
14 mm di pioggia)*

Rispetto a Maggio WMO (1991-
2020) si osserva un **surplus** del
+19% corrispondente a **+13 mm** di
pioggia media regionale

MAGGIO 2024

Differenza (% e mm) delle precipitazioni dell'ultimo mese vs trentennio
medio WMO (1991- 2020)

**Distribuzione
dell'indice SPI
a 30 giorni
Maggio 2024**

Legenda

	Estremamente secco
	Molto secco
	Moderatamente secco
	Vicino alla norma
	Moderatamente umido
	Molto umido
	Estremamente umido

MAGGIO 2024

Differenza (% e mm) delle precipitazioni degli ultimi 3 mesi vs trentennio medio WMO (1991- 2020)

**Distribuzione
dell'indice SPI
a 90 giorni
Maggio 2024**

Legenda

	Estremamente secco
	Molto secco
	Moderatamente secco
	Vicino alla norma
	Moderatamente umido
	Molto umido
	Estremamente umido

MAGGIO 2024

Differenza (% e mm) delle precipitazioni degli ultimi 6 mesi vs trentennio
medio WMO (1991- 2020)

**Distribuzione
dell'indice SPI
a 180 giorni
Maggio 2024**

Legenda

	Estremamente secco
	Molto secco
	Moderatamente secco
	Vicino alla norma
	Moderatamente umido
